

# HUDSON

**ON THE LEADING EDGE OF AXIAL FAN DESIGN**

## *Tuf-Lite IV* with *Tuf-Edge*®

### **THE NEXT GENERATION OF AXIAL FAN**

**Hudson** has engineered the next generation of axial flow fan. The innovative **Tuf-Lite IV** is engineered using computational fluid dynamics (**CFD**) technology to provide the most aerodynamic efficiency in the industry. Finite element analysis (**FEA**) and Hudson's stringent internal testing standards are used to design the most **durable** Tuf-Lite® blade for the most extreme environments. Tuf-Lite IV is a **game changer** in the cooling tower and air-cooled condenser markets. Due to the optimized design, the Tuf-Lite IV was developed to attain a wider speed range application and achieve required results more efficiently than other fans in the market. Don't settle for anything less than a **Tuf-Lite**®. Hudson is committed to providing the most **reliable\*** and **efficient** fan to our customers.

## **AHEAD OF THE CURVE** NOW ACCEPTING ORDERS

\* - Thirty-six (36) month standard warranty applies, refer to standard T&C's.

**THE WORLD LEADER IN AXIAL FLOW FANS**
